## Escalating Geopolitical Tensions in Middle East and Black Sea Threaten Global Logistics, Domestic Port Strikes Add Pressure

The past week has seen a significant escalation in geopolitical tensions, particularly in the Middle East with US-Iran and Israel-Hezbollah conflicts leading to multiple port strikes (Bandar Abbas, Fujairah) and threats to critical shipping lanes. Similar drone attacks have impacted Black Sea ports (Odesa, Tuapse). These events pose a severe threat to NovaTech's international freight operations, increasing transit times and costs. Domestically, a transporters' stir at JNPA further exacerbates operational risks, threatening EXIM disruptions. The cumulative effect points to a high-risk environment for supply chain stability and operational efficiency.

### ● Key Performance Indicators

|                                                                             |                                                                        |                                                            |
|-----------------------------------------------------------------------------|------------------------------------------------------------------------|------------------------------------------------------------|
| <div>78%</div> <div>On-Time Delivery</div> <div>-7%</div>                   | <div>\$3200/TEU</div> <div>Freight Cost Index</div> <div>+\$400</div>  | <div>12%</div> <div>Vendor SLA Breach</div> <div>+4%</div> |

● Mitigation Action Plan

| Pri.   | Action                                                                                                                   | Owner                     | Deadline | Impact                                               |
|--------|--------------------------------------------------------------------------------------------------------------------------|---------------------------|----------|------------------------------------------------------|
| HIGH   | Diversify shipping routes and port partnerships to reduce reliance on high-risk areas (e.g., Middle East, Black Sea).    | Operations Director       | 2026-Q3  | Reduce exposure to geopolitical disruptions.         |
| HIGH   | Increase inventory buffer days for critical goods to absorb short-term supply chain disruptions.                         | Supply Chain Manager      | 2026-Q2  | Enhance resilience against unexpected delays.        |
| MEDIUM | Enhance real-time geopolitical and maritime intelligence monitoring to improve early warning and response capabilities.  | Risk Analyst Team         | 2026-Q2  | Proactive risk identification and response.          |
| MEDIUM | Develop and test contingency plans for key port closures (e.g., Bandar Abbas, JNPA) and alternative logistics corridors. | Contingency Planning Lead | 2026-Q3  | Expedite response and minimize operational downtime. |
| LOW    | Review and update insurance policies to ensure adequate coverage for war risk, political instability, and cargo damage.  | Legal & Finance           | 2026-Q3  | Mitigate potential financial losses.                 |

● Event Tree Analysis

Initiating Event: Escalation of US-Iran/Israel-Hezbollah conflict

|                                                                   |                                                                                                                       |                                                                                                                                           |
|-------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| ? Major shipping lane (e.g., Strait of Hormuz) becomes impassable | ✓ YES (40%)<br>Global supply chain collapse, extreme freight cost spikes, NovaTech faces severe operational paralysis | ✗ NO (60%)<br>Localized port closures, rerouting via longer, costlier routes, NovaTech experiences significant delays and increased costs |
|-------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
